

DR. DANIEL SCHERZ

Speaking about Sustainability

Speaker, planner, scientist - and sustainability fan. With my professional background, I always offer a technically sound overview of sustainable construction with illustrative information from research and practice. But above all, I provide a motivating outlook on the opportunities and potential for the construction industry, with a wide range of suggestions for implementation and inspire to think outside the box.

Keynotes und Moderation

- Sustainable construction

Why do we need sustainable construction, what does this mean in concrete terms for the construction industry and how can we benefit from it?

- Future city

What does the further development of our cities look like, what are our levers and why are these cities particularly worth living in?
